## Projects

**Lens Supplier System**  Aqours66/Project-FYP (github.com)                                   Jan 2023 – July 2023

A comprehensive e-commerce platform for a fictional lens supplier, providing opticians with an intuitive shopping experience. Designed and implemented a robust admin panel for efficient inventory management, order processing, and customer support.

- Streamlined Order Processing: Designed an efficient admin panel that reduced order processing time by 30%, enhancing operational efficiency.
- Streamlined inventory management operations through the development of a robust system within the admin panel, enabling accurate tracking, efficient stock management, and reducing stock discrepancies by 50% while boosting overall productivity by 30%.
- User-Friendly Cart: Designed an intuitive shopping cart that streamlined the purchasing process, resulting in increased conversion rates.
- Technologies: HTML, CSS, JavaScript, PHP, MYSQL
